

How to build your own **IN-GROUND WORM BIN**

Materials:

- 5 gallon bucket
- 5 gallon bucket screw top lid
- Motorized drill
- 1/2"-3/4" paddle (spade) bit
- Shovel

Directions:

1. Secure screw top lid on to the bucket.
2. Drill about 20- 1/2" or 3/4" holes around the side and 10- 3/4" holes around the bottom, evenly spaced apart.
3. Dig a hole about 13" deep and 11" wide to fit and bury the bucket.

Solana Center
FOR ENVIRONMENTAL INNOVATION

The screw top should remain above surface level.

4. Remove or bury bucket handle.
